The screenshot shows a Java IDE interface with a 'Console' tab selected. The console output displays the execution of a Java application named 'guiwindow'. It shows the loading of three audio files: 'open.wav', 'walk.wav', and 'win.wav'. For each file, the format is specified as 'PCM\_SIGNED' with a frequency, bit depth, channel count, bytes per frame, and endianness.

```
guiwindow [Java Application] C:\Program Files\Java\jre1.8.0_25\bin\javaw.exe (Dec 10, 2014, 9:40:0
open.wav
PCM_SIGNED 16000.0 Hz, 16 bit, mono, 2 bytes/frame, little-endian
walk.wav
PCM_SIGNED 48000.0 Hz, 16 bit, stereo, 4 bytes/frame, little-endian
win.wav
PCM_SIGNED 44100.0 Hz, 16 bit, stereo, 4 bytes/frame, little-endian
```
